communication issues with the Marshal's Table. Informs the handler on time remaining in the brace and when time is up in the brace. The Judge observes all activity of the dog, handler and gunner during the brace. Utilizing the current Trial Rule Book the Judge records the scoring of the performance of the dog. Monitors the activity of the handler, gunner, and other participants and notifies them of any hazards which may jeopardize safety. When the Judge is notified by the handler that the dog is on "Point" the Judge will communicate with the gunner and handler as to their safest position. BIRD PLANTER(S):

Bird planters are responsible for planting birds before each brace. Bird planting technique can vary depending on terrain, weather, individual birds, and the planter's personal discretion. Planters can dizzy the bird and tuck it's head under a wing (often stroking the bird's chest to relax the bird) for a tight plant. The bird can also be tossed/placed without dizzying into a bush for a much looser plant. Most birds tend to move towards trees, so planting near the edge of a bird field with trees nearby and outside the boundary of the bird field will often result in birds migrating out of bounds.

HANDLER(S):

Handlers are responsible for handling, guiding, and/or controlling a dog during a brace. This is often the owner of the dog performing this task, but is not required to be. The handler must sit with the dog in a blind before his/her brace as well as collar the dog when required. Handler is responsible for indicating to judge when their dog is on point. A

handler can also perform gunner duties for themselves if so desired.
